

## Uganda Hub

### HUB OF INNOVATION

The University of Minnesota Academic Health Center (AHC) established the Uganda Hub in August 2015. The Hub is anchored by a strong collaboration between the University of Minnesota and Makerere University that has been growing since 2005.

The Hub aims to focus engagement on pressing global health challenges through key partnerships that lay the foundation for sustainable organizational infrastructure for interdisciplinary research and education, allowing for the creation and exchange of new knowledge within a culture of reciprocal engagement.

In our Hubs, we establish in-country operational resources to support research and learning. We advance relationships to engage in new and continued activity in regional networks that will address the global health grand challenges of the 21st century.

UNIVERSITY OF MINNESOTA

*Center for Global Health  
and Social Responsibility*

### SERVICES

Hub staff can consult with partners and students in a variety of areas:

- Contracts and facilitation projects
- Research resources
- Linking with multidisciplinary academic partners
- Arranging workspace
- Short and long-term lodging
- Traveling to Uganda

### SPACE

Partners can reserve space for meetings or arrange for long term work space in two locations:

- MUJHU Research Collaboration, MUJHU Tower 3, Upper Mulago Hill Road, Kampala
- Infectious Disease Institute (IDI), IDI Knowledge Center, Kampala

### MINNESOTA-UGANDA PARTNERSHIPS GROUP

- Represents colleges, schools, and units engaged with or interested in engaging as partners between Minnesota and Uganda with future potential for impact on the central and east African region.
- Helps coordinate the health sciences' growing presence and engagement within the University and Uganda in global health.
- Contact us for information about membership.
